VOYAGER I

Geen aarde en geen dagen meer.
Altijd nacht, altijd zon.
'k Zwalk lekker voort,
de ruimte is vast, de tijd
het slappe koord.

Ik ben, op weg naar het Heelal,
een nieuwe coördinaat.

De zon verwarmt mij
nauwelijks meer.

COVER: Simulated production of a black hole in the particle detector ATLAS on the Large Hadron Collider at CERN. This track is an example of simulated data and would be produced if a miniature black hole was created in a proton-proton collision. Such a small black hole would decay instantly to various particles via a process known as Hawking radiation. Credit: CERN.
